*** For HRB Dealers - Please find the service price list with your discounted parts cost in the Databank**

Please Note: The above labor prices include any of the upgrades on the following pages that correspond with the Annual and Five year service. The service technician needs to disassemble most or all of the Prism 2 to perform the annual service so no additional labor charges are required. On page two and three you can pick from each of the items that are listed and have them replaced at no additional labor charge at the time of service. i.e DIVE CAN Cables are removed during the five year service and the orings are replaced. If the cable is replaced at that time you are only charged the price of the cable since the labor is already being performed.
